

STARRETT COMPARATORS AND VIDEO SYSTEMS

When it comes to comparators, there's only one clear choice – Starrett. Starrett combines advanced optics and imaging technology to ensure bright, sharp images and exceptional accuracy. With a vast selection of styles, sizes, stages, lenses, and other accessories, Starrett has a comparator for most any application. Starrett video-based measurement systems combine high-resolution imaging, powerful intuitive software, and precision mechanical platforms to deliver high accuracy and repeatable measurement results.

APPLICATIONS

- Comparison Measurement
- Multi-Part Measurement
- Dimensional Measurement
- Geometric Tolerancing

PRECISION METROLOGY SYSTEMS FOR INDUSTRIAL QUALITY CONTROL

Precision metrology systems play a critical role in empowering manufacturers to enhance productivity and maintain exceptional quality standards. These advanced solutions leverage data-driven insights and cutting-edge technologies to streamline processes across the entire manufacturing workflow—from design and engineering to production and quality assurance.

MSI Viking has a comprehensive portfolio of metrology hardware, software, and services. These systems enable accurate measurement and control, driving smarter and more efficient manufacturing practices. As trusted partners in industrial quality control, these solutions support industries in optimizing operations and achieving superior performance in an increasingly competitive landscape.
