

LUNCH
AND
LEARN

Portable Metrology

Wednesday, June 24, 2026

[Click Here](#) or [Scan QR Code](#) to RSVP

Join MSI Viking for an engaging Lunch & Learn focused on the latest advancements in portable metrology solutions from Hexagon Manufacturing Intelligence. This session will explore how laser trackers, articulated measuring arms, and handheld 3D scanners are transforming inspection workflows across manufacturing environments by delivering fast, accurate, and flexible measurement capabilities directly on the shop floor. Designed for quality professionals, engineers, manufacturers, and production leaders, this event will provide practical insight into portable metrology applications for large-part inspection, in-process verification, reverse engineering, alignment, assembly, and quality control.

Topics Include:

- Introduction to portable metrology technologies
- Laser trackers for large-scale measurement and alignment
- Portable articulated arms for dimensional inspection
- Handheld 3D scanning for complex geometry capture
- Improving inspection speed and workflow flexibility
- Shop-floor measurement strategies and best practices
- Real-world applications in aerospace, automotive, heavy equipment, energy, defense, and advanced manufacturing

Who Should Attend

Quality engineers, manufacturing engineers, metrology specialists, managers/supervisors, and technical leaders responsible for measurement accuracy, throughput, and compliance.

Why Attend

Learn from subject-matter experts | See how modern metrology drives better decisions | Network with peers facing similar challenges

Join MSI Viking and our key technology partners for a focused Lunch & Learn series designed for quality, manufacturing, and engineering professionals. Each session delivers practical insight into modern metrology challenges—how to measure better, faster, and with confidence—while respecting your time.

About the Greer Facility

MSI Viking's Greer, SC location supports manufacturers with local access to precision measurement solutions, calibration services, repair coordination, and application guidance.

864.433.9771 Direct access to the MSI Viking Greer location.

This event will be held at MSI Viking Headquarters located at 140 Lakeside Industrial Way, Greer, SC 29651

Format: 10:00 AM – 1:00 PM

- Technical presentation and application discussion
- Real-world examples and best practices
- Networking lunch with hands-on discussion
