## WHY COMPANIES INVEST IN MICROREP

Many manufacturers and calibration laboratories are discovering that bringing gage calibration in-house significantly reduces outsourcing costs, shortens turnaround times, improves traceability, and strengthens compliance with ISO 9001, AS9100, IATF 16949, and ISO 17025 requirements.

For many organizations, the payback period is driven simply by eliminating external calibration expenses and improving internal responsiveness. Microrep — The Price/Performance Leader

Microrep has established itself as one of the strongest value propositions in the gage calibration market by combining:
